

REDEFINE BOUNDARIES AND PERFORMANCE WITH COASTAL LIFTSIDE DOORS

The Andersen® Liftside door takes the indoor/outdoor lifestyle to the next level with the ultimate sliding glass wall system coupled with coastal performance to maximize energy efficiency goals.

KEY FEATURES

- Panel options include: stacking, pocketing and corner configurations
- The 3 3/16" profile design accepts either a 1/2" wood cladding attached to the interior by a patented fastening system that joins them structurally while separating them physically
- Same sash design used for Andersen Liftside and Pivot doors
- Available with high performance impact-resistance glass
- Hallmark certified rating for air, water and structural performance
- Heavy-duty aluminum framed bottom gliding, 1 3/8" thick, insect screens are available

HIGH PERFORMANCE SILL

- Patented, flush track with only 3/16" profile above the finished floor
- Hardened anodized aluminum track that has been tested for harsh weather environments
- Designed to accommodate variations in flooring materials and extreme weather conditions to further enhance the door system's weather resistance*

MATERIAL

- Two material designs: Aluminum with wood interior cladding (AWLS) and All Aluminum with Thermally Broken Panel (ALS-T)
- Aluminum profile is an extruded 6063 alloy T-5

SIZES AND CONFIGURATIONS

- Options include: straight wall, pocketing and 90° corner
- Panels built as tall as 12' with AAMA ratings, FL Product Approvals and Hallmark rated
- Rough openings as wide as 43', panels up to 60 sq ft.
- Panels up to a maximum of 7' wide with FL #17559

PERFORMANCE*

- Tested to the North American Fenestration Standard (NAFS) at a PG45 level
- Tested to TAS and ASTM Impact standards at PG80 (DP +80/-80) for 8' tall and smaller doors and PG45 (DP+45/-55) for 12' tall doors
- Coastal ratings for oversized panels to TAS (Miami-Dade protocol) and ASTM standards

*See your local code official for code requirements in your area.

*Hallmark Rated max panel size: 5' x 12'

**Hallmark Rated max panel size: 5' x 8'

- "Performance Grade" (PG) ratings may vary from tested performance rating for larger or smaller units of a particular type. Some units may not be rated.
- This data is accurate as of June 2020. Due to ongoing product changes, updated test results or new industry standards, this data may change over time.
- Where designated, Andersen® products are certified and labeled to the requirements of the Hallmark Certification Program. Actual performance may vary based on variations in manufacturing, shipping, installation, environmental conditions and conditions of use.
- Contact your Andersen supplier for more information.
- Values are for interior stacking doors. Contact your Andersen supplier for availability of exterior stacking door values.
- DP range +45/-45 to +80/-80 based on panel size per FBC approval.

FINISH OPTIONS

Exterior Options:

- 50 standard color options, custom colors available at no addition upcharge
- Three anodized finishes are available for a rich, lustrous metallic appearance – clear anodized, black and dark bronze anodized*
- High-quality AAMA 2605 Kynar® finish is standard

Aluminum Wood-Clad Door Interior Options:

- Choose any wood species; common options include alder, mahogany,** pine and vertical grain Douglas fir

HARDWARE

ROLLERS

- Roller system of European design
- Handles are used to lift the door panel, engaging the wheels and allowing it to roll smoothly and almost effortlessly along the flush track

*Anodized finishes have a unique patina as result of naturally forming aluminum oxide on a surface. The process makes each unit one of a kind and may appear to have an inconsistent color and/or finish.

**Actual wood species is Sapele, a non-endangered species grown in Africa, with color and characteristics similar to Central American mahoganies.

†Not recommended for commercial options.

Oil rubbed bronze is a "living" finish that change with time and use.
