SEE NEW UNOBSTRUCTED GLASS SIZES

(1992 - March 2017)

These 5'-9" height units are "cottage style" units, and have unequal sash. The top sash is shorter than the bottom sash.

Units with equal sash heights are ordered by description. Contact dealer for lead times.

* "Window Dimension" always refers to outside frame to frame dimension.
 • Dimensions in parentheses are in millimeters.
 • Meet or exceed clear opening area of 5.7 sq.ft. or 0.53 m², clear opening width of 20" (508) and clear opening height of 24" (610).

400 Series Tilt-Wash PG Upgrade Windows (2003 to Present)

DP Upgrade Windows

Product History

Product History

- 2008** SmartSun™ glass introduced.
- 2007** Monolithic Impact Resistant glass introduced and marketed as Stormwatch because of DP/PG ratings achieved. See DH-207 for more detail.
- 2006** Brackets used on interior changed to “flip-up” design. See DH-206 for more detail.
- 2003** Factory applied DP Upgrade introduced.

Sash

Sash Size Table

Note:

- Upper and Lower Sash is measured outside edge to outside edge of sash frame.
- Unobstructed Glass is measured from outside edge to outside edge of visible glass only. See [Measuring Visible Glass Video](#).
- Sash with HDN (High Definition) grilles use unique glazing bead listed in sash section.
- 46 Even (upper and lower) and 56 Cottage (upper and lower) height changed in April 2017.
- 310 Even (upper and lower) height changed in September 2017.
- When using/ordering for Conversion Kits the 310 and 46 sizes are **not** impacted by design changes made in 2017.

Sash Balancers

Balancer Usage Chart (1992 - Present)

Note:

T = Balancer with tab.

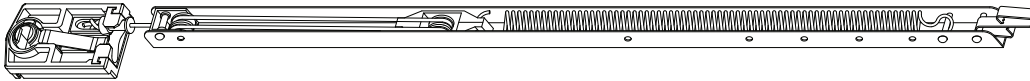

S = Balancer with shoe.

S & T = Two balancers used: one with shoe and one with tab.

These charts are used to identify balancers for TW (Tilt-Wash) double hung units.

The following charts show the balancers that you need for the upper and the lower sash. A complete unit will use either 4, 6 or 8 balancers.

- If one number is listed this balancer is used on the upper sash as well as the lower sash.
- If two balancer sizes are listed, you need both of those balancers for the upper and both for the lower sash.
- Each sash will use either two (one on each side) or four (two on each side) balancers on each sash, see [page 26](#).
- If an S & T follows a number, you need two balancers for the upper sash, one with a shoe and one with a tab and two for the lower sash, one with a shoe and one with a tab.
- See Stormwatch Section to identify balancer chart for glass types not listed in Chart 1 through 4.
- Balancer may be etched with 3 or 4 digit number.
- 46 sash height changed 4/2017
- 310 sash height changed 9/2017

Tilt-Wash Balancer (Block and Tackle with Shoe)

Beginning in April of 2012, glass may be etched with 2.2 or 3.0 etchings. If you have a sash made prior to April of 2012 use glass type to identify balancer needed. If you have a sash made after April 2012 use glass type as well as any 2.2 or 3.0 etching around logo. Glass with 2.2 etchings will use Chart 1 or 3, glass with 3.0 etchings will use Chart 2 or 4. Glass type HP, HP Sun, HP SmartSun™ and HP PassiveSun™ manufactured prior to April 2012 will not have 2.2 etching, but will use Chart 1 or 3.

2.2 Etching

3.0 Etching
