Unit Sizes

Standard and Custom Window Sizes

Note:

100 Series Single Hung Windows are available in standard sizes (see standard size charts, [page 7](#)). Replacement parts for some standard windows can be ordered using the numbers listed in this catalog. Many replacement parts for standard windows are made to order. These items are ordered using the Product ID found on the identification label and a description of the part needed. See [Service Guide 9051877](#).

100 Series Single Hung Windows are also available in custom sizes in 1/8" increments between the smallest and the largest standard sizes. Most replacement parts for custom-sized windows are made to order and can be ordered with the Product ID found on the identification label and a description of the part needed. See [Service Guide 9051877](#).

100 Series Product Label

Note:

Every 100 Series Single Hung Window will have an identification label **or** glass etching containing a unique Product ID. The Product ID on 100 Series Single Hung Windows will be located at the top of the window frame or etched into the glass. See [Service Guide 9051877](#). The Product ID may be up to 14 digits long (excluding hyphens), depending on the age of the unit. Replacement parts will also get their own unique Product ID. When ordering replacement parts, providing the Product ID ensures that replacement parts match the specifications.

100 Series Single-Hung Windows (2008 to Present)

Standard and Custom Windows

Sash

Balancer Chart

Note:

Balancers have length and counter-balance information stamped on face. The first one or two digits identify the approximate length and the second two digits identify a weight range (ie a 2050 balancer number is 20 inches long and a pair will counterbalance 50 pounds. See PD 228).

*Balancers marked as N/A use next longer length (ie SH710 uses SH 810. SH 910 uses SH 1010). Unit heights between 23.50 and 25.75 will use 8 inch balancers. Unit heights between 25.875 and 27.75 will use 10 inch balancers. Replace both balancers.

Balancer Chart

Note:

Balancers have length and counter-balance information stamped on face. The first one or two digits identify the approximate length and the second two digits identify a weight range (ie a 3550 balancer number is 35 inches long and a **pair** will counterbalance 50 pounds. See PD 228).

Service Replacement

Service Replacement Only Parts

Service Replacement Only Parts

Note:

This section is specifically designed for parts that should only be ordered if a TSM/SPC has requested them to be ordered or if the customer agrees to also pay for a non-warranty repair/replace service job (subject to availability) for these parts to be installed. We do not recommend anyone other than a trained AW employee or Service Provider install these parts due to the complexity of installation, modifications required for installation and/or requirement of special tools.
